Section 2 RISK FACTORS

The New Shares offered under this Prospectus are considered speculative. The Directors strongly recommend investors examine the contents of this Prospectus and consult their professional advisers before deciding whether to apply for New Shares pursuant to this Prospectus. In addition, investors should be aware there are risks associated with investment in the Company. There are certain general risks and certain specific risks which relate directly to the Company's business and are largely beyond the control of the Company and its directors because of the nature of the business of the Company.

The following summary, which is not exhaustive, represents some of the major risk factors which potential investors need to be aware of:

- **Share Market Conditions**

As Marengo is a company listed on ASX, its Share price (and subsequently, option price) is subject to the numerous influences which may affect both the trend in the share market and the share prices of individual companies.

- **Economic Conditions**

Economic conditions, both domestic and global, may affect the performance of the Company. Factors such as currency fluctuation, inflation, interest rates, supply and demand and industrial disruption have an impact on operating costs, commodity prices, including gold prices, and share market prices. The Company's future possible revenue and share price can be affected by these factors all of which are beyond the control of the Company and the Directors. In addition, the Company's ability to raise additional capital, should it be required, may be affected.

- **Operational Risk**

By its nature, the business of exploration, mineral development and production which the Directors intend the Company to undertake contains risks. Prosperity depends on the successful exploration and/or acquisition of reserves, design and construction of efficient processing facilities, competent operation and management and efficient financial management. For its part, exploration is a speculative endeavour, while mining operations can be hampered by force majeure circumstances and cost overruns for unforeseen events.

- **Environmental Risks**

Exploration programmes impact on the environment. These impacts are minimised by the Company's application of best practice principles.

- **Government Policy**

Industry profitability can be affected by changes in government policy relating to mineral exploration and production which are beyond the control of the Company.

- **Commodity Prices**

The prices that the Company may obtain for mineral commodities may fluctuate due to market conditions and to the exchange rate.
